			<u><u>\$284,921,000</u></u>	

The Building Board gave several projects a lower ranking to indicate that further analysis is needed with the intent of considering them for funding next year. At its November 5, 2003 meeting, the Board will incorporate its priority list into a Five-Year Building Plan.

The above list only reflects requests for state funds. Several of these projects also include funds from other sources. The Board also recommended a number of projects that are funded entirely from other sources. These projects will be presented on a separate list.
